Alumni Survey 2018, Master of Urban Planning

Introduction

In June 2018, the faculty of the UB Department of Urban and Regional Planning launched the sixth annual survey of its graduates. We asked graduates from the most recent five years to rate us on how we have done so that we can formally track our outcomes and evolve in better directions as needed.

MUP alumni by the numbers

Number of MUP graduates between 2013 and 2017: 152.

Alumni were distributed as follows: 2013: 30; 2014: 26; 2015: 39; 2016: 28 and 2017: 29.

Number of such graduates with email addresses: 151

Survey process

We sent a letter via e-mail to our MUP alumni announcing the survey along with a link to the survey itself (the survey was administered through a third-party survey site, SurveyMonkey). The survey was open for two weeks and a reminder to participate was sent a week after the survey opened.

Confidentiality

Participation was voluntary. Survey subjects were not asked to provide personal information. Results are only presented in aggregate form. No individual responses are revealed.

Survey subjects are not charged to complete the survey, and they are not compensated. Names of survey subjects can never be connected to survey responses.

How we define planning and planning-related positions

We sought information on the types of jobs in which our graduates are employed. A planning position may take place at local, regional, state (province), national, or international levels. It may occur in the public sector, public authority, nonprofit organization, or private sector. Specific fields that constitute planning include: arts and culture planning, community activism/empowerment, community development, consulting, disaster planning, economic development, energy development and planning, environmental planning, GIS and other computer applications to planning, historic preservation and heritage, housing, international development, land use and code enforcement, legal practice related to planning, natural resources planning, neighborhood planning, parks and recreation, planning education, planning for training programs, planning within an architectural or engineering firm, planning management/finance, public health, real estate development, tourism development, transportation planning and analysis, urban design, and waste management. A planningrelated position includes consulting, design, development, nonprofit management and administration, policymaking, policy analysis, corporate location, health policy analysis, and public administration that in some way uses your planning skills or contributes to planning objectives but does not fall under the first definition above.
